1 Mobile applications: Metadata creation system for mobile images   ■
Risto Sarvas, Erick Herrarte, Anita Wilhelm, Marc Davis
June 2004 **Proceedings of the 2nd international conference on Mobile systems, applications, and services**
Full text available: 📄 pdf(564.05 KB)   Additional Information: full citation, abstract, references, index terms

The amount of personal digital media is increasing, and managing it has become a pressing problem. Effective management of media content is not possible without content-related metadata. In this paper we describe a content metadata creation process for images taken with a mobile phone. The design goals were to automate the creation of image content metadata by leveraging automatically available contextual metadata on the mobile phone, to use similarity processing algorithms for reusing shared me ...

2 Books and reading: A document corpus browser for in-depth reading   ■
Eric Bier, Lance Good, Kris Popat, Alan Newberger
June 2004 **Proceedings of the 2004 joint ACM/IEEE conference on Digital libraries**
Full text available: 📄 pdf(164.61 KB)   Additional Information: full citation, abstract, references, citings, index terms

Software tools, including Web browsers, e-books, electronic document formats, search engines, and digital libraries are changing the way people read, making it easier for them to find and view documents. However, while these tools provide significant help with short-term reading projects involving small numbers of documents, they provide less help with longer-term reading projects, in which a topic is to be understood in depth by reading many documents. For such projects, readers must find and m ...
